

MINI CLIPS

FOR FUEL PIPES AND SMALL HOSES

JCS Mini-Clips are an economical and reliable solution for many low pressure applications where a larger adjustment range is not required. They are especially suitable for petrol and LPG gas hoses and are available in sizes ranging from 9mm O/D to 18mm O/D.

JCS Mini-Clips are formed from a one-piece band, which means they have no welded parts which can damage the hose. Also, the band is folded over the nut which ensures it remains firmly in place when the screw is removed.

The screw head is formed to a 7mm hexagon head so that the JCS flexible shaft screwdriver can be used making fitting quicker and easier especially in awkward places. The screw head is also slotted for ordinary screwdriver use.

TECHNICAL & MATERIAL SPECIFICATION

Size	Dia mm
9	7-9
10	8-10
11	9-11
12	10-12
13	11-13
14	12-14
